

REMARKS

Applicant respectfully requests reconsideration of the present application in view of the reasons which follow.

The Examiner objects to the disclosure under 37 CFR § 1.163(a) and rejects the claim under 35 U.S.C. 112, first and second paragraphs, as being unsupported by a clear and complete botanical description which distinguishes the cultivar from related known varieties. Favorable reconsideration and allowance of the application is requested in view of the foregoing amendments and the remarks which follow.

In order to expedite the Examiner's review of this response, Applicant will address each of the Examiner's objections in the order they were discussed in the Official Action.

A. The specification has been amended at page 1, line 5, to amend the variety denomination of the plant from 910.02.2273 to PKMh03. As a result, the specification has been amended throughout to replace all occurrences of '910.02.2273' with 'PKMh03'.

B. The specification has been amended at page 1, line 3 and line 8, to correct the species name of the plant. The amended genus and species name of the plant is *Campanula X haylodgensis hort.*

C. The specification has been amended at page 1, line 10, to clarify how the new instant plant was produced. The new *Campanula* '910.02.2273' is a product of a planned mutant selection and monitoring program. The specification was further amended at page 1, line 11 and line 19, to delete the recitation "at PKM Nurseries."

D. The specification at page 2, line 18, and the abstract at page 9, line 5, have been amended to correct the flower color to white.

E. The specification has been amended at page 4, lines 4-9, to provide a corrected description of the three drawings filed with the application on November 21, 2003.

F. The applicant confirms that the RHS color designation of the pistil is 4D, yellow.

G. The specification has been amended at page 7 to provide a more complete reproductive organ description of the new *Campanula* cultivar. Specifically, the applicant has provided pollen amount and color; pistil number and length; style length and color; ovary color; seed number, corrected length and diameter measurements, texture, and color of immature seed; and fruit type. The applicant has also provided information regarding disease resistance and disease susceptibility.

H. The specification has been amended at the following locations to provide the additional requested information of the new *Campanula* cultivar:

Page 5, line 16:	Internode Length
Page 6, line 1:	Petiole Length, diameter and RHS color designation
Page 6, line 15:	Flower number and flower width

In addition, the specification has been amended throughout to change the title of the instant plant from '910.02.2273' to --'PKMh03'--.

Further, please note that the attorney docket number has been changed for this application from 034896-0104 to --047894-0104--.

Due to the number of changes and/or corrections, Applicant hereby files a Substitute Specification containing no new matter. The Examiner is authorized to cancel the specification as filed in favor of the attached substitute specification.

Applicant believes that the present application is now in condition for allowance.
Favorable reconsideration of the application as amended is respectfully requested.

The Examiner is invited to contact the undersigned by telephone if it is felt that a telephone interview would advance the prosecution of the present application.

The Commissioner is hereby authorized to charge any additional fees which may be required regarding this application under 37 C.F.R. §§ 1.16-1.17, or credit any overpayment, to Deposit Account No. 19-0741. Should an improper payment be enclosed herewith, as by a check being in the wrong amount, unsigned, post-dated, otherwise improper or informal or even entirely missing, the Commissioner is authorized to charge the unpaid amount to Deposit Account No. 19-0741.

Respectfully submitted,

Date November 23, 2004
